

ENERGY STAR[®] Light Fixture Rebate

Why install ENERGY STAR[®] light fixtures?

- They use 1/4 the energy of traditional lighting. Homeowners save money on energy bills and bulb replacements, with bulbs that must last at least 10,000 hour (about seven years of regular use).
- Come in hundreds of decorative styles including portable fixtures — such as table, desk and floor lamps — and hard-wired options such as front porch, dining room, kitchen ceiling and under-cabinet, hallway ceiling and wall, bathroom vanity fixtures, and more.
- Deliver convenient features such as dimming on some indoor models and automatic daylight shut-off and motion sensors on outdoor models.
- Carry a two year warranty — double the industry standard.

ENERGY STAR Rebate - 2010

Light Fixture Rebate....50% of the cost up to \$20

Must be purchased after 1/1/10
Limited funds available
Contact REA for a rebate form

If every home in America completely replaced the five light fixtures they use most with ENERGY STAR qualified models, we would collectively prevent greenhouse gases equivalent to the emissions of more than 10 million cars.
